SUMMARY

Senior Flutter Developer with 4+ years of professional experience delivering scalable, high-performance mobile and web applications across Android, iOS, and Web. Proven expertise in designing robust application architectures, developing end-to-end features, and integrating RESTful APIs, Firebase, payment gateways, maps, and third-party services. Strong command of Flutter, Dart, clean architecture, state management, and performance optimization, with a track record of building maintainable, secure, and production-ready solutions. Experienced in translating business requirements into reliable software products, collaborating with development teams, conducting code reviews, and driving technical improvements throughout the development lifecycle.

EXPERIENCE

Softect Business Services

Apr. 2026 – Present *Senior Flutter Developer*

Rawalpindi, Pakistan

- Lead the development of scalable Flutter applications for Android, iOS, and Web, delivering end-to-end features from development to production.
- Design and implement maintainable application architecture while integrating RESTful APIs, Firebase services, payment gateways, maps, and third-party SDKs.
- Mentor and guide junior developers, conduct code reviews, troubleshoot complex technical issues, and promote clean and maintainable code.
- Optimize application performance, stability, and reliability while delivering secure and production-ready features.

CrypSol Technologies

May 2024 – Apr. 2026 *Senior Flutter Developer*

Rawalpindi, Pakistan

- Developed scalable and high-performance Flutter applications for Android and iOS with a focus on maintainability and reliability.
- Implemented clean architecture, state management, RESTful API integrations, Firebase services, and third-party SDKs.
- Designed reusable components and optimized application performance, stability, and code quality through refactoring and technical improvements.
- Collaborated with cross-functional development teams to translate business requirements into reliable and production-ready features.

Owasoft Technologies

Dec. 2022 – May 2024 *Junior Flutter Developer*

Rawalpindi, Pakistan

- Developed Flutter applications using GetX, Provider, Firebase, and RESTful APIs for Android and iOS.
- Built responsive and reusable UI components while following maintainable development practices.
- Integrated APIs, databases, authentication, and third-party services to support application features and business requirements.
- Contributed to debugging, performance optimization, and application architecture improvements across multiple projects.

Eziline Software House

Jul. 2022 – Oct. 2022 *Flutter Intern*

Rawalpindi, Pakistan

- Developed responsive Flutter UI screens and reusable components for mobile applications.
- Built practical experience in Flutter, Dart, UI implementation, debugging, and mobile application development.

EDUCATION

National University of Modern Languages (NUML)

2020 – 2024 *Bachelor of Science in Computer Science*

Islamabad, Pakistan

- Final Year Project:** Generative AI Assistant for Healthcare
- GPA:** 3.27 / 4.0

Punjab Group of Colleges

2018 – 2020 *Intermediate in Computer Science*

Rawalpindi, Pakistan

SELECTED PROJECTS

Audit Tracker 24/7 | *Flutter, REST APIs*

- Developed a business and accounting management application with API-driven modules for sales, purchases, products, customers, suppliers, accounts, expenses, and reports.

Real-Time Bus Tracking | *Flutter, Firebase, Google Maps*

- Developed a real-time transportation tracking application with Firebase integration and map-based location tracking.

Donation App | *Flutter, Firebase, Payment Gateway*

- Developed a donation application with Firebase integration and payment gateway functionality for secure donation workflows.

Super VPN | *Flutter, Firebase, REST APIs*

- Developed a cross-platform VPN application with REST API integration, Firebase services, and connection management functionality.

Khaleej Property App | *Flutter, REST APIs*

- Developed a property-focused application with API-driven data, responsive interfaces, and reusable Flutter components.

BizHub | *Flutter, Hive*

- Developed a business management application using Flutter and Hive for efficient local data storage and application workflows.

TECHNICAL SKILLS

Mobile Development : Flutter, Dart, Android, iOS, Web

Architecture : Clean Architecture, MVVM, Repository Pattern, SOLID Principles

State Management : GetX, Provider

Backend APIs : RESTful APIs, Firebase, Authentication, Firestore, FCM, Storage

Databases : Hive, SQLite

Integrations : Google Maps, Payment Gateways, Third-Party SDKs

Development Tools : Git, GitHub, CI/CD, App Deployment

Other : Responsive UI, Pixel-Perfect UI, Performance Optimization, Agile Development, Java, OOP

LANGUAGES

English : Professional Working Proficiency

Urdu : Native / Fluent

Punjabi : Native / Fluent
